ICCCN is one of the leading international conferences for presenting novel ideas and fundamental advances in the fields of computer communications and networks. ICCCN serves to foster communication among researchers and practitioners with a common interest in improving communications and networking through scientific and technological innovation.

Scope:
The primary focus of the conference is on new and original research results in the areas of design, implementation, and applications of computer communications and networks. Authors are invited to submit papers that present original research to one of the following tracks:

- Track on High-speed Distributed Systems and Grids (HDSG)
- Track on Internet Services, Applications and Protocols (ISAP)
- Track on Multimedia and Peer-to-Peer Networking (MP2P)
- Track on Network Algorithms, Performance Evaluation and Theory (NAPET)
- Track on Network Security and Privacy (NSP)
- Track on Optical and Backbone Networks (OBN)
- Track on Wireless Communication and Signal Processing (WCSP)
- Track on Wireless Networks and Emerging Technologies (WNET)

Instructions for Authors:
Submitted manuscripts must be formatted in standard IEEE camera-ready format (double-column, 10-pt font) and must be submitted via EDAS (http://edas.info/) as PDF files (formatted for 8.5x11-inch paper). The manuscripts should be no longer than 6 pages. Up to two additional pages are permitted if the authors are willing to pay an over-length charge at the time of publication (manuscripts may not exceed 8 pages). Submitted papers may not have been previously published in or be under consideration for publication in another journal or conference. The Program Committee reserves the right to not review papers that either exceed the length specification or have been submitted or published elsewhere. Submissions must include a title, abstract, keywords, author(s) and affiliation(s) with postal and e-mail address(es). A paper abstract must be registered on EDAS by the deadline indicated below.

Review and Publication of Manuscripts:
All submitted papers will be reviewed by the respective track TPC and judged on originality, technical correctness, relevance, and quality of presentation. An accepted paper must be presented at the conference venue by one of the authors registered at the full registration rate. Each full registration covers up to two papers by an author. Accepted papers will be published in proceedings that will be available through IEEE Xplore (pending IEEE approval). Papers that are not presented at the conference by one of the authors will not appear in IEEE Xplore.

Workshops:
The conferences will feature satellite workshops. Workshop proposals should be submitted to the Workshop Chair, Xiaobo Zhou (zbo@cs.uccs.edu). The details on the call for workshop proposals can be found on the conference web site.

For additional information on track TPCs, student travel grants, best paper award, and other information see the conference web page or contact the general co-chairs.
